Hordhac iyo Ujeeddo

Dokumentigan wuxuu sharxayaa dhammaan meelaha lacagtu ka soo gasho, meelaha ay ku baxdo, cidda leh, sida loo xisaabiyo, sida loo diiwaangeliyo, iyo xaaladaha lacag celinta ama ganaaxa ee LudoSom. Tirooyinka ku qoran waa kuwa code-ka hadda ku jira; admin-ku wuxuu beddeli karaa qaar ka mid ah qorshayaasha sida VIP, tournaments, agents iyo payment providers.

Qaanuunka ugu muhiimsan: lacagta stake-ka ah marka ciyaartu bilaabato waxaa laga saaraa wallet-ka ciyaaryahan kasta oo lagu xiraa escrow. Marka server-ku xaqiijiyo natiijada, escrow-ga waxaa loo kala diraa winner payout iyo app revenue.

Gross iyo Net: qoraal sida “Bet \$0.30 · Win \$0.60” wuxuu muujinayaa pot-ka kahor app rake. Lacagta winner-ka dhab ahaan loo credit-gareeyo user caadi ah waa \$0.54.

3. Paid Games iyo Rake

3.1 Stakes-ka la heli karo

Preset stakes: \$0.30, \$0.50, \$0.75, \$1, \$2, \$5, \$10, \$25, \$50, \$100. Custom stake: minimum \$0.01, maximum \$100, ugu badnaan laba decimal.

Gross Pot = Stake × Real Players

Standard Rake = Gross Pot × 10%

Winner Payout = Gross Pot – Rake

3.2 Laba qof Solo — user caadi ah

Stake qofkiiba	Gross pot	App 10%	Winner payout	Winner net profit	Loser loss
\$0.30	\$0.60	\$0.06	\$0.54	\$0.24	\$0.30
\$0.50	\$1.00	\$0.10	\$0.90	\$0.40	\$0.50
\$0.75	\$1.50	\$0.15	\$1.35	\$0.60	\$0.75
\$1.00	\$2.00	\$0.20	\$1.80	\$0.80	\$1.00
\$2.00	\$4.00	\$0.40	\$3.60	\$1.60	\$2.00
\$5.00	\$10.00	\$1.00	\$9.00	\$4.00	\$5.00
\$10.00	\$20.00	\$2.00	\$18.00	\$8.00	\$10.00
\$25.00	\$50.00	\$5.00	\$45.00	\$20.00	\$25.00
\$50.00	\$100.00	\$10.00	\$90.00	\$40.00	\$50.00

3.3 Saddex iyo afar qof Solo

Qaab	Stake	Pot	App	Hal winner payout	Winner profit
3-player Solo	\$0.30 qofkiiba	\$0.90	\$0.09	\$0.81	\$0.51
4-player Solo	\$0.30 qofkiiba	\$1.20	\$0.12	\$1.08	\$0.78

3.4 Partnership 2v2

Afarta qof stake isku mid ah ayay bixiyaan. Pot-ka net-ka ah waxaa si siman loogu qaybiyaa labada winner. Haddii cent aan si siman u qaybsamin, winner-ka ugu dambeeya ayaa helaya remainder-ka si total-ku u saxnaado.

```
$0.30 × 4 = $1.20 pot  
App = $0.12  
Team payout = $1.08  
Winner kasta = $0.54 (net profit $0.24)  
Loser kasta = -$0.30
```

Rounding: lacagta waxaa lagu qorayaa laba decimal. Custom stake \$0.01, 2-player pot \$0.02 wuxuu leeyahay theoretical rake \$0.002 oo u wareega \$0.00; payout-ku wuxuu noqon karaa \$0.02. Sidaas darteed app-ku ciyaartaas rake dhab ah kama helo.

4. VIP Economy

4.1 Qorshayaasha default-ka

Plan	Qiime	Muddo	Rake discount	Effective rake
Silver	\$4	1 bil	1 percentage point	9%
Gold	\$10	1 bil	2 points	8%
Platinum	\$25	3 bilood	4 points	6%
Diamond	\$45	6 bilood	5 points	5%

- VIP price isla markiiba wallet-ka ayaa laga jaraa, dhammaantiisna app revenue ayuu noqdaa.
- Renewal isla tier ah wuxuu muddada cusub ka sii raaciyaa expiry-ga hadda jira.
- Tier kale ama expired plan wuxuu ka bilaabmaa waqtiga iibka.
- Admin-ku qiimaha, muddada, discount-ka iyo features-ka wuu beddeli karaa; discount kama badnaan karo base rake 10%.

4.2 \$0.30 Solo payout marka winner VIP yahay

Winner	Rate	App (rounded)	Payout	Net profit
Normal	10%	\$0.06	\$0.54	\$0.24
Silver	9%	qiyaastii \$0.05	\$0.55	\$0.25
Gold	8%	qiyaastii \$0.05	\$0.55	\$0.25
Platinum	6%	\$0.04	\$0.56	\$0.26
Diamond	5%	\$0.03	\$0.57	\$0.27

Team game-ka effective rake waxaa laga qaataa celceliska discounts-ka winners-ka dhabta ah. Losers-ka VIP status-kooda rate-ka ma beddelo.

5. Bot Economy

Bot game-ku gebi ahaanba wuu ka duwan yahay paid human match:

- Stake-ka la doortay **lama lock-gareeyo**.
- Haddii human-ku badiyo: wallet + **\$0.01**.
- Haddii bot-ku badiyo: human wallet – **\$0.02**, laakiin lagama jari karo wax ka badan balance-ka jira.
- Bot charge-ka app revenue category-ga **bot_result** ayuu galaa.
- Team bot game: human winner kasta +\$0.01; human loser kasta ilaa –\$0.02.

Tusaale: user balance \$1.00, stake selector \$50 ayuu saaran yahay, bot ayuu la ciyaaray. User hadduu badiyo wuxuu noqdaa \$1.01; bot hadduu badiyo wuxuu noqdaa \$0.98. \$50 lama lock-gareeyo.

6. Exit, Forfeit, Inactivity, Cancellation iyo Refund

Xaalad	Player money	Winner/App
Ka bax waiting room kahor start	Stake wali lama lock-gareyn; wax ganaax ah ma jiro.	Qolku wuu sii jiraa ama wuu xirmaa.
Pending join request cancel	Wax lacag ah lama jarin.	Wax dakhli ah ma jiro.
2-player paid game: qof baxa	Leaver stake wuu luminayaa, loss count +1.	Opponent wuxuu helaa pot – effective rake; app forfeit rake.
2-player inactivity	Inactive player stake wuu luminayaa, loss +1.	Active opponent payout; app forfeit rake.
3/4 Solo: hal qof baxa	Stake lama celiyo; player left/loss ayaa noqda.	Ciyaartu way sii socotaa; eventual winner pot oo dhan less rake.
2v2: hal qof baxa/inactive	Kooxdiisa oo dhan way guuldarraysataa; forfeiter iyo partner loss records.	Labada opponent waxay qaybsadaan net pot; app forfeit rake.
Admin cancels paid room	Real player kasta full stake ayaa loo refund-gareeyaa.	Game rake ma jiro.
Tournament match forfeit	Game-room stake = \$0; entry fee tartanka ayaa hore loo bixiyey.	Opponent round-ka ayuu gudbaa; prize final-ka ayaa bixiya.

Xaalad edge ah: haddii dhammaan active players ay baxaan/inactive noqdaan, code-ku escrow-ga zero ayuu ka dhigayaa iyadoo aan refund ama house-revenue transaction cad la qorin. Tani waa meel audit iyo policy u baahan.

7. Spectator Betting

7.1 Shuruudaha

- Keliya spectator aan ciyaarta ku jirin ayaa bet dhigi kara.
- Hal bet qofkiiba ciyaar kasta.
- Stake minimum **\$0.10**, maximum **\$10.00**.
- Doorasho: W (target/team wins) ama L (target/team loses).
- Market-ku wuu xirmaa marka token kasta gaaro position 51 ama ka badan.
- Risk limit: selected side pool kama badnaan karo ugu badnaan 5× opposing pool, iyadoo minimum balancing base = \$1.

7.2 Dynamic pool iyo odds

```
Total Pool = W stakes + L stakes
Distributable = Total Pool × 90%
App Betting Margin = Total Pool × 10%
Final Odds = Distributable Pool ÷ Winning-side Pool
```

Tusaale

W side = \$4, L side = \$6, total = \$10. Haddii target-ku badiyo:

- App = \$1.
- W bettors waxay saamigooda ugu qaybsadaan \$9.
- Final odds = $9 \div 4 = 2.25$.
- Qof \$1 W dhigtay wuxuu helayaa \$2.25; net profit \$1.25.

7.3 Goorta bet la refund-gareeyo

Full stake refund ayaa dhacaya haddii:

- Room status cancelled yahay.
- Server-ku winner sax ah waayo.
- Winning side aanu lahayn wax bets ah.
- 90% distributable pool uusan ka weynayn winning-side principal pool; taas oo macnaheedu yahay winner faa'iido macquul ah ma helayo.

Refund xaaladahan app-ku betting margin ma qaato.

8. Tournaments

8.1 Socodka lacagta

Collected Entry Fees – Refunds – Prize Pool = Tournament Margin

- Register: entry fee wallet-ka laga jaraa oo tournament escrow transaction ah noqda.
- Winner-ka final-ka: full configured prizePool ayaa wallet-ka loogu daraa.
- App revenue: net collected entries – prize.
- Custom tournament lama bilaabi karo haddii prize aanu entries-ku si buuxda u fund-gareyn karin.

8.2 Default tournaments

Tournament	Entry × Max	Max collected	Prize	Expected margin
Weekly Champion	\$5 × 16	\$80	\$72	\$8
Weekend High Stakes	\$10 × 8	\$80	\$72	\$8
Daily Quick Sprint	\$2 × 4	\$8	\$7.20	\$0.80

8.3 Unregister iyo cancellation

- Voluntary unregister inta registration open tahay: **90% refund, 10% cancellation fee** app revenue.
- Marka tournament bilaabmo ama dhammaado unregister lama oggola.
- Haddii aan la fund-gareyn waqtiga start-ka: hal mar 12 saac ayaa dib loo dhigaa; markii labaad waa cancelled oo full entry refunds la bixiyaa.
- Check-in window: 5 daqiiqo.
- Haddii zero players check-in sameeyaan: tournament cancelled, dhammaan registered players full refund.
- Haddii hal player check-in sameeyo: walkover winner ayaa full prize hela.
- Haddii laba ama ka badan check-in sameeyaan: kaliya kuwa checked-in ayaa bracket-ka gala.

Policy hadda jira: players-ka registration bixiyey laakiin check-in seegay si cad refund looma siinayo. Entry-gooda wuxuu ku sii jiraa net collected calculation. Tani waa no-show penalty aan UI/terms-ka si cad loogu magacaabin.

8.4 Admin tournament cancellation/removal

Admin cancel endpoint-ku registered player kasta entry fee-ga buuxa ayuu ugu celiyaa. Admin player-ka tartanka ka saaro sidoo kale entry fee buuxa ayuu refund-gareeyaa. Voluntary unregister-ga user-ka keliya ayaa leh 10% fee.

9. Agent Economy

9.1 Agent linkage

Promo code ayaa player-ka ku xira agent. Marka la xiro, deposit/withdraw request agent kale looma wareejin karo. Agent-ku wuxuu arkaa linked players iyo requests-kiisa oo keliya.

9.2 Float purchase iyo commission

Agent commission-ku ma aha fee laga jaro player transaction kasta. Waa **discount uu agent-ku ka helo marka admin-ku float u kordhiyo**.

```
Agent Float Issued = Requested Float
Agent Commission Discount = Float × Commission Rate
Admin Cash Received = Float - Commission Discount
```

Tusaale: 5% agent commission

```
Float +$100 → Agent discount $5 → Admin cash $95 → Agent usable float $100
```

9.3 Player deposit via agent

```
Player wallet +$20 → Agent float -$20
```

Agent float-ku waa inuu ku filnaadaa. Deposit-ka qudhiisu app revenue ma aha; waa liability/float transfer.

9.4 Player withdrawal via agent

```
Player wallet -Request Amount → Agent pays Net Amount → Agent float +Net Amount →
Fee (haddii jiro) → App
```

Paid-game user badanaa fee 0% ayuu leeyahay. No-play user fee 10% minimum \$0.10.

Fiiro: monthly agent salary liability dashboard-ka waa la muujiyaa, laakiin formula `netPlatformEarnings` si toos ah ugama jaro ilaa nidaam payment/expense ahaan loo xaqiijiyo. Sidoo kale hosting, Firebase/TURN, payment-provider charges iyo taxes kuma jiraan formula-kan.

Gunaanad

LudoSom wuxuu leeyahay revenue model isku dhafan: 10% game rake, 10% spectator margin, VIP subscriptions, bot-result charges, tournament margins/cancellation fees iyo conditional withdrawal fee. Agent-ku wuxuu maamulaa float, commission-kiisuna wuxuu ka yimaadaa float purchase discount; admin/cashier-na waxay maamulaan approvals,

settings, payroll iyo audit. Nidaamka aasaasiga ahi server-authoritative iyo ledger-based ayuu yahay, balse risk register-ka kore waa in loo qaataa shaqada xigta si financial reporting, refunds iyo user transparency loo adkeeyo.

Dokumentigan waa sharaxaad code-audit ah, ma aha talo sharci ama xisaabeed. Kahor lacag dhab ah oo ballaaran, terms, licensing, tax, responsible-gaming iyo independent financial/security audit waa in la waafajiyaa dalka/markets-ka app-ku ka shaqeeyo.
